Warranty..... 3 years

Rubber mulch with a binder, for natural style and unitary performance

### Description

GT Impax Bonded Rubber is an attractive, seamless surface that uses clean, shredded rubber from recycled tires to create a useful and environmentally responsible safety surfacing. In many regions, bonded rubber provides a lower cost option than other seamless surfaces. It does not absorb water, and with proper drainage will not freeze. It's a great option for paths and walkways.

Installation must be performed by technically trained, GameTime certified installers, and requires specific depth, slope, and tolerance of the base materials. Thicknesses are varied to meet specified play equipment critical fall heights per the ASTM F1487 standard. The product is porous to allow free flow of water, so it doesn't puddle, and is always ready for play.

### Benefits

- Available in fifteen colors
- Great accessibility
- Natural appearance
- Lower maintenance
- Single pour may result in lower cost when compared to Poured in Place
- UV and moisture-resistant
- Installed with proper drainage, does not freeze in cold climatic conditions

### Tips

- Great option for accessible pathways within a loose-fill play zone
- Include wear mat inserts under swings and at end of slide bedways
- Maintenance is required to keep high traffic areas sealed

### Basic Specification

GT Impax Recycled Bonded Rubber surfacing is comprised of a precise combination of 100% wire free, clean recycled rubber, a polyurethane binder, and a pigmented colorant. The binder is a 100% Single Component MDI based Polyurethane binding agent. The product shall be poured in place and troweled to provide a resilient, seamless appearance. Temperature should be a minimum of 40-45 degrees and a maximum of 95 degrees Fahrenheit during installation.

This product meets all applicable ASTM standards. For more information, please refer to our complete product specification.
